Re: The FDA warning letter sent to IRC

We are in receipt of an FDA "Warning Letter" dated July 19, 2010 and are preparing a detailed response.

IRC takes its role of reviewing research protocols and subject consent forms very seriously. In over 25 years of service, we have reviewed over a thousand protocols. During those years, we have been audited not only by the FDA, but also by many sponsors, and contract research organizations.

Please be assured that we will continue to provide quality IRB review services and consulting to our clients.

Erica Heath, CIP, MBA
President IRC
