IRB membership is consistent with the requirements of 21 CFR 56.107 and 45 CFR 46.107.

- The IRB has seven members.
- The members have diverse and varied backgrounds.
- There are both men and women on the board.
- One member's primary concern is in a non-scientific area.
- All regular members are unaffiliated with IRC except for their IRB membership; no two are affiliated with the same institution.
- No member will participate in a review, except to provide information, if that member has any conflict of interest with the study or the sponsor.

---

Federal Wide Assurance: IRC asks that clients seeking an FWA assign a person with a high level of authority to be available to the IRB during consideration of that client's studies. This member must be conversant with the performance site resources. No person with an equity interest in IRC will participate in the review.

---

IRC reserves the right to modify this list at any time.  
 IRC reserves the right to add consultants to advise the IRB about local conditions or on complex issues requiring expertise beyond that available on the board.
